

What is Mirostone?

Mirostone is a range of durable work surfaces that have all the beauty and feel of natural stone combined with exceptional practicality. Mirostone is the perfect surface for domestic kitchens, but is equally at home in the bathroom or bedroom. Mirostone can be safely installed in your home using standard woodworking tools. So Mirostone successfully avoids all the time consuming delays and inconvenience of other surfaces.

Colour all the way through

Mirostone's colourful designs are not just skin deep, they run consistently throughout its 20mm thickness. So now you can have some uniquely stylish and practical worksurface features.

Ahead of the curve

Mirostone can be easily installed to follow the contours (including curves) of your kitchen cabinet design, without the need for time consuming edge treatments.

Mirostone's edge profile

Mirostone comes with a 1mm bevelled edge giving it a sleek and modern finish.

Get into the groove

Hygienic drainer grooves can be installed into your Mirostone surfaces on site and without any delay or inconvenience.

The safest surface

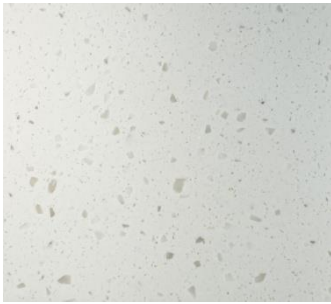

Mirostone is a completely safe surface on which to prepare and eat food. Mirostone is easy to clean and waterproof so harmful germs are prevented from being harboured on the surface.

Perfect for all wet areas

Because Mirostone is a solid work surface with no chipboard core, it is completely waterproof and hygienic making it the perfect surface for your kitchens, laundries and vanities.
