Our Rebel Series

# Drift

Defying Convention

Patience may be a virtue, but passion can make you restless. Drift gives you a headstart on getting the rustic, silver finish you'd otherwise have to wait years to achieve. Because you know what? Sometimes virtue is overrated.

In addition to our **thermally modified** ash and pine, Drift uses thermally modified spruce to create a stunning product with a 25+ year rot-resistance rating.

Get the look of reclaimed wood without the unknowns, and with the unrivaled stability and rot-resistance of Thermory products.

# Unconventional aesthetic, unrivalled durability.

Drift uses the same thermal-modification process as our Benchmark series to create real wood that is modified to perfection, leaving no fiber unaltered. Then the wood is colored and textured to closely resemble reclaimed wood, giving you the best of both worlds. Choose from a number of colors that give the unique weathered appearance of aged wood.

# Driven by innovation.

Thermory harbors a deep desire to create innovative solutions that offer unrivaled efficiency and beauty in wood.

Our Rebel Series brings this desire to life. Drift was released at the international Thermory 20th anniversary event in 2017.

But we're not stopping here. What's next for Thermory and the Rebel Series? You'll have to wait and see.
